

**ALS / BLS PROTOCOLS—INTRODUCTION**

1. ALS and BLS protocols are to be utilized by EMS personnel and as a resource for Base Hospital physicians to become familiar with local EMS patient care. All procedures and/or medications must be within the scope of practice for field personnel and authorized in Solano EMS policies.
2. All ALS and BLS protocols are intended to be used as guidelines and are not a substitute for sound medical judgment. Unusual patient presentations make it impossible to develop a protocol for every possible patient situation.
3. Disrupted Communications: In the event that a Solano County paramedic is unable to make physician contact for orders, the paramedic may not utilize those areas of the protocols requiring physician direction and must transport immediately to the closest receiving facility.
4. Base Hospital Contact: Paramedics are expected to use sound medical judgment in caring for every patient. Solano County EMS Protocols give paramedics wide latitude in deciding when to make Base Contact. Base physician contact is always available and should be utilized in the following circumstances:
  - a. Any time Base Hospital contact is required in a protocol.
  - b. Unusual patient situations not covered in a protocol.
  - c. Situations where deviation from a protocol appears to be in the patient's best interest.
  - d. For any patient attended by a physician on the scene (see Policy 6510).
  - e. For any patient who is Refusing Medical Assistance that, in the judgment of the paramedic, should be treated and/or transported to a hospital.
  - f. Out-of-protocol medication administration. In some situations it may be appropriate to utilize medications carried by paramedics for indications not covered in one of the Solano EMS ALS Protocols. Examples include: sodium bicarbonate for tricyclic antidepressant overdose or renal failure patient with presumed hyperkalemia; glucagon for beta-blocker or calcium channel blocker overdose; calcium chloride for hydrofluoric acid exposure, calcium channel blocker overdose, or renal failure patient with presumed hyperkalemia; albuterol nebulizer for possible hyperkalemia; diphenhydramine for acute dystonic reaction; high-dose atropine for organophosphate exposure.
  - g. Paramedics may contact another Base Hospital if they are not able to contact the original Base Hospital physician for orders. This may occasionally occur due to hospital equipment failure or if the original Base Hospital is unable to handle the call.

**CODES      DEFINITION**

|       |                 |
|-------|-----------------|
| 10-7  | out of service  |
| 10-8  | en route        |
| 10-22 | cancelled       |
| 10-55 | dead on arrival |
| 10-97 | on the scene    |
| 261   | rape            |
| 5150  | psych hold      |

# **Protocol Reorganization List**

## **Solano County EMS Agency, July 2025**

### **REMOVED:**

#### **c-1 Shock without Respiratory Distress -**

Only contains instructions to give oxygen which is in C-01 Shock

#### **c-2 Shock with Respiratory Distress -**

Only contains instructions to give oxygen which is in C-01 Shock

#### **p-3 Hypotension**

Does not give any useful treatments other than give oxygen

#### **r-2 Croup/Epiglottitis -**

Information is now in combined R-01 Airway Obstruction

#### **r-3 Respiratory Distress -**

Information is contained in R-03 Generalized Shortness of Breath

#### **r-4 Respiratory Arrest -**

Information is contained in R-02 Respiratory Failure

#### **t-7 Soft Tissue Trauma -**

No longer needed protocol, outdated/incorrect

#### **Pediatric Basic Principals ET Tube sizes and wording -**

CA no longer allows pediatric intubation, ETT info outdated

### **RENAMED or MOVED:**

#### **B-1 Behavioral Emergencies in Adults -**

Renamed to B-01 Behavioral Emergencies

#### **B-02 Child/Elder/Dependent Adult Abuse, Domestic Violence, and Sexual Assault -**

Renamed to M-09 Abuse and Sexual Assault and **moved to Medical section**

#### **C-1 Shock -**

Renamed to M-07 Shock and **moved to Medical section**

**C-3 Pulseless Arrest -**

Renamed and moved to C-01 Cardiac Arrest

**c-11 Chest Pain non-cardiac -**

Moved to C-09 Chest Pain (Non-Cardiac)

**C-10 Chest Pain (Cardiac in Nature) -**

Renamed to C-10 Chest Pain (Cardiac)

**Section Disaster Incidents -**

Renamed to Disaster

**D-1 Multiple Casualty -**

Renamed to D-01 Mass Casualty Incident

**E-01 Heat Illness – Hyperthermia -**

Renamed to E-01 Heat Injury – Hyperthermia

**E-02 Hypothermia / Frostbite -**

Renamed to E-02 Cold Injury / Hypothermia

**E-3 Envenomation -**

Renamed E-03 Bites / Stings / Envenomation

**E-04 Burns -**

Renamed to T-09 Burns and moved into Trauma section

**H-1 Hazardous Material Exposure -**

Renamed to E-06 Hazardous Material Exposure and moved to Environmental section

**M-2 General Medical Complaints -**

Moved and renamed M-01 General Medical Treatment

**M-1 Abdominal Pain -**

Moved to M-02 Abdominal Pain

**M-3 Severe Nausea and Vomiting -**

Renamed to M-03 Nausea and Vomiting

**M-6 Poisons / Drugs -**

Renamed M-06 Poisoning / Overdose

**N-2 Seizures -**

Renamed to be N-02 Seizure

**n-3 Seizures -**

Renamed to be N-02 Seizure

**N-4 Acute Cerebrovascular Accident (Stroke) -**

Renamed to N-04 Stroke

**Section OB-GYN Emergencies -**

Renamed to Obstetrics

**o-1 Vaginal Hemorrhage with Shock -**

**o-2 Vaginal Hemorrhage without Shock -**

o-1 and o-2 combined and renamed to O-01 Vaginal Hemorrhage

**0-3 Imminent Delivery No Complications -**

Renamed to O-03 Normal Childbirth

**o-4 Imminent Delivery with Complications -**

Renamed to O-04 Childbirth Complications

**0-4 Imminent Delivery with Complications -**

Renamed to O-04 Childbirth Complications

**p-1 Cardiorespiratory Emergencies -**

Renamed to P-01 Pediatric Cardiac Arrest

**p-4 Neonatal Resuscitation -**

Moved to P-02 Neonatal Resuscitation

**P-4 Pediatric Bradycardia with Pulses -**

Renamed P-04 Pediatric Bradycardia

**P-5 Pediatric Tachycardia with Pulses -**

Renamed to P-05 Pediatric Tachycardia

**P-6 Pediatric Non-Traumatic Shock -**

Renamed to P-06 Pediatric Shock

**p-10 Pediatric Toxic Exposure/Ingestion/Opioid Overdose -**

Renamed to P-10 Pediatric Poisoning / Overdose

**P-13 Pediatric General Medical -**

Renamed to P-13 Pediatric General Medical Treatment

**r-4 Respiratory Arrest -**

Moved to R-02 Respiratory Failure – Arrest

**R-3 Generalized Shortness of Breath -**

Renamed to R-03 General Respiratory Distress

**r-4 Respiratory Arrest -**

Moved to R-02 Respiratory Failure

**r-5 COPD and r-6 Asthma-Bronchospasm -**

Moved to R-06 Asthma / COPD / Bronchospasm

**R-7 Congestive Heart Failure (CHF) and Pulmonary Edema -**

Renamed to R-07 CHF / Pulmonary Edema

**T-01 General Trauma -**

Renamed to T-01 General Trauma Treatment

**T-2 Specific Treatments -**

Separated into individual page and renamed T-02 Traumatic Cardiac Arrest, T-03 Head and Spinal Trauma, T-04 Chest Trauma

**t-5 Abdominal Trauma and t-6 Extremity Trauma -**

Combine into T-05 Abdominal and Extremity Trauma

**T-7 Management of Suspected Open Book Pelvic Fracture -**

Renamed to T-07 Pelvic Trauma

**Pediatric Basic Principles -**

**Moved to General Information section**

**Added “refer to Pain Management” to protocols containing conflicting pain medication doses:**

**C-05 Wide Complex Tachycardia**

**C-06 Bradycardia**

**C-08 Narrow Complex Tachycardia**

**C-10 Chest Pain (Cardiac)**

**C-14 Chest Pain – STEMI**

**T-09 Burns**

**M-01 Abdominal Pain**

**P-05 Pediatric Tachycardia**

**P-11 Pediatric Burns**

**P-12 Pediatric Trauma**

**Pediatric Basic Principals**

**T-01 General Trauma Treatment**

**T-05 Abdominal and Extremity Trauma**

## **PROTOCOL GUIDANCE CHANGE**

**S-11 Ventricular Assist Device**

CPR instructions changed from "Do not perform chest compressions" to "YOU MAY perform chest compressions".
